Francisco Tárrega Complete Guitar Works, Vol. 1

30 original Studies for Guitar
Edition by Melchor Rodríguez

Ref: SEM0909
PVP: 16 €
ISBN: 84-87969-00-3
45 pp. ; 23x31,5 cms. ; Rustic

A new edition based on manuscripts and original editions (texts in english and spanish)

This volume contains **30 ORIGINAL STUDIES** for the guitar by F. Tárrega which were composed as lessons for his disciples. Each study was written with a specific pedagogical aim, using different formulas, both technical as well as musical, characteristic of this instrument. These studies will help the guitarist make important progress which will later aid him in overcoming, without fatigue, the problems of new Works he must incorporate into his repertory and which use different formulas and are written in different styles.

These studies expound upon such important matters as scales, ligatures, barré, etc. on the technical side, and phrasings, articulations, etc., on the interpretative side.

The studies, along with those of other composers like D. Aguado, F. Sor, etc., are the basic foundations and essential complements to an adequate work programme for the guitarist.

25 original Studies for Guitar
Edition by Melchor Rodríguez

Ref: SEM0910
PVP: 19 €
ISBN: 84-87969-33-X
78 pp.; 23x31,5 cms.; Rustic

A new edition based on manuscripts and original editions (texts in english and spanish)

These **25 ORIGINAL STUDIES** for guitar by F. Tárrega complete, along with the 30 elementary ones included in Volume 1, the pedagogical part of the didactic studies Tárrega composed for the guitar. These works, like the previous ones, were written as classes for his disciples, and have the same technical-musical purpose, being elaborated with the concrete aim of overcoming the characteristic difficulties of the guitar. They produce fine results; since the guitarist studying them will progress greatly on his way to becoming a professional virtuoso of the guitar.

Sor, Villalobos and other composers who complement Tárrega are also essential to any guitar study programme.

35 original Preludes for Guitar
Edition by Melchor Rodríguez

Ref: SEM0911
PVP: 19 €
ISBN: 84-87969-33-X
78 pp.; 23x31,5 cms.; Rustic

A new edition based on manuscripts and original editions (texts in english and spanish)

The **35 ORIGINAL PRELUDES** for guitar by F. Tárrega are perhaps the highest-quality part of his body of music. They remind us of the Preludes by F. Chopin, whom Tárrega greatly admired, and of which he made various transcriptions for the guitar. This musical formula was used during the Romantic period in two ways: as a simple warm-up exercise before the public at a recital, and as a discourse of the highest musical level that was played at important concerts. Tárrega composed a few for the first use; the majority were written to be included, due to their quality, at public recitals.

Nueva edición basada en sus manuscritos y ediciones originales

The **31 ORIGINAL PIECES** for guitar by F. Tárrega are important representations of the Romantic epoch in the history of the guitar movement. They did not always reach us with the authenticity of their creator, however; quite the contrary, as only deficient and incorrect versions had been known up to now, a fact that has created confusion among guitar players.

Today, thanks to the publishing of new editions based on Tárrega's manuscripts and original editions and the ongoing research carried out by young, promising guitarists, Tárrega is known and played by today's best. His works are interpreted in many international concert halls, and recordings of them are heard worldwide. All this has brought this important composer international recognition and deserved prestige.

With this volume **31 ORIGINAL PIECES** Vol. V, Tárrega's original plays are completed. It contains: Famous dances, Fantasías, Variations.

This part is the higher instrumental and interpretative level where Tárrega shows his great knowledge of the instrument as well with the dances as with the fantasies and variations. Using all the strum scales of the instrument, passing, as it is, his habit in all his tunes, through the most normal guitar techniques.

When played, his pieces create a peculiar ambience characteristic of the atmosphere surrounding this instrument, passing in turn through the most natural technique that exists for the guitar.

PVP: 39 €
ISBN: 84-87969-38-0
228 pp.; 22,5x31cms.; Rustic

Facsimile original edition 1860 (texts in english and spanish)

Julián Arcas was, beyond a doubt, the best guitarist of his time. This magnificent artist, who achieved international recognition through contemporary music authorities and critics, was the link in the chain that ran from Sor and Aguado to Tárrega.

Knowledge of the figure and name of Arcas, as well as his guitar works, is absolutely essential. His compositions for this instrument embody different styles of the times, and range from folk to symphonic; in all, a total of 52 works, according to this study, of which, and according to the author's titles, 44 are original and 8, arrangements.

These arrangements and themes, which Arcas played masterfully on the guitar, befit a time when Italian influence was frequent throughout Europe. On the other hand, Arcas also made use of Spanish regional themes as motivation for his works in which the guitar would take on its most original style representative of Spanish music.

This publication is facsimile on the J. Arcas' original 1860 editions, and the previously unknown ones found in manuscripts of his student, F. Tárrega.

The charm of this piece lies in the simplicity of the writing, comprehensible to technical middle level guitar's students, since more of them are developed into the first five frets and many easily performable chords. Starting from the half of the book the difficulty degree of pieces increases gradually just to arrive to the last part where the most worked and artistic ones are and, like S. de Murcia suggest a the prologue, "they are addressed to the more advanced".
